1. What is Angular and how does it support SPA?
2. What is Angular CLI and why is it useful?
3. What is a component in Angular?
4. How do you implement routing in Angular 18?
5. What is interpolation in Angular?
6. What is property binding in Angular?
7. What is two-way data binding?
8. What is a structural directive?
9. What is an attribute directive?
10. What pipes are in Angular?
11. What is control flow in Angular 17+?
12. What is a signal in Angular?
13. What is a service in Angular?
14. What is dependency injection (DI) in Angular?
15. What are lifecycle hooks in Angular?
16. How do services interact with lifecycle hooks?
17. What is deep routing in Angular?
18. What are guards in Angular?
19. How does AuthService work with JSON?
20. What is an interceptor in Angular?
21. How do you send a token in the header?
22. What is the role of NgModules in Angular?
23. How does Angular's change detection work?
24. What is OnPush change detection strategy?
25. What is the difference between ViewChild and ContentChild?
26. How does Angular handle lazy loading?

27. What is standalone component architecture?

28. What is the role of Signals in Angular 17+?

29. How do you create a custom directive?

30. What is the difference between `ngIf` and `@if`?

31. How does Angular handle form validation?

32. What is a resolver in Angular routing?

33. How do you implement guards for role-based access?

34. What is the role of `HttpClient` in Angular?

35. How do interceptors handle global errors?

36. What is the difference between `ngOnInit` and constructor?

37. How do you share data between components?

38. What is the role of `ngZone`?

39. How does Angular handle SSR (Server-Side Rendering)?

40. What is hydration in Angular SSR?
